Summary

Full-Stack Developer and Applied ML enthusiast experienced in building end-to-end data pipelines and deploying AI models into responsive web and mobile interfaces. Seeking Full-Stack roles that let me keep developing product interfaces and mobile apps, while contributing to applied AI/ML through model development and deployment.

Skills

Languages: Python, Java, JavaScript,SQL

Full-Stack: React, React Native, Node.js, Express, Flask, Spring Boot.

AI/Machine Learning: PyTorch,CNNs,OpenCV,Scikit-Learn

Databases : MySQL, MongoDB,PostgresSQL

Tools:GitHub, Git, Postman

Projects

Otolith Analysis and Classification System

Otolith Analysis — built a lab-to-product pipeline for otolith image classification and morphology extraction using a hybrid CNN + fuzzy-logic model; exposed inference via a Flask API and React UI.

Key Feature:

- Frontend & storage: React UI + SQLite for local datasets; focused on automating feature extraction and iterating with domain users.

Early Detection of Mental Illness Using CNN and Chat Bot

End-to-end ML project: designed and trained a PyTorch CNN for Alzheimer's stage classification and wrapped inference in a Flask demo web app.

Key Feature:

- Integrated PyTorch model outputs for clinical-style review and built basic visualization features, achieving 90% prediction accuracy.

EnvDex – Premium Biodiversity Journal & Species Archive

Built an offline-first mobile client (React Native / Expo) and React dashboard for collecting and visualizing field observations; implemented local storage (Realm/SQLite) and GPS capture.

Key Feature:

- Designed the app architecture so future AI species ID models can be plugged into the data pipeline.

URRJA – Decentralized Peer-to-Peer Energy Trading Prototype

Hardware-oriented prototype where I programmed embedded logic for energy trading and implemented the matching/trade simulation.

Key Feature:

- Developed the web/digital interface to present market flows and let users simulate buyer/seller actions (trade logic + device integration).

Position of Responsibility

AI/ML And Data Analytics Team Co-Lead, Google Developers Group, VIT AP

Jan 2025 – Jun 2025

Research Team Lead, Entrepreneurship Club VIT-AP

Jul 2024 - Oct 2024

Documentation & Content Team Lead, Anchoring Club VIT-AP

Sept 2024 - April 2025
