Pune,India | rasekaramey@gmail.com | 94033-20981 | Portfolio | Linked.In | github.com/Arceus1916

Summary

Aspiring AI/ML and Data Analytics Engineer with strong foundations in machine learning, deep learning, and full-stack application development. Experienced in building AI-driven solutions using Python, PyTorch, SQL, and Flask, with hands-on expertise in integrating analytical models into real-world applications. Passionate about solving complex business and research problems through data-driven and intelligent systems.

Skills

Programming: Python, Java, SQL,JS

AI/Machine Learning: PyTorch,Scikit-Learn,CNNs,NLP

Frameworks: Spring Boot,Flask,React.js

Databases : MySQL, MongoDB

Tools:GitHub, Git, Postman

Projects

Otolith Analysis and Classification System

Developed a full-stack AI application for fish species classification and otolith morphology analysis using Hybrid CNN-Fuzzy models and computer vision techniques.

Key Feature:

- Integrated PyTorch, OpenCV, Flask, React, and SQLite to automate species classification and extract morphological characteristics from otolith images.

Early Detection of Mental Illness Using CNN and Chat Bot

Developed a deep learning-based application for Alzheimer's stage classification from MRI brain scans using Convolutional Neural Networks (CNNs).

Key Feature:

- Integrated a PyTorch CNN model into a Flask-based web application, enabling automated MRI classification with over 90% prediction accuracy.

EnvDex – Premium Biodiversity Journal & Species Archive

Developed a biodiversity data management platform enabling structured collection, organization, and visualization of flora and fauna observations.

Key Feature:

- Implemented offline data storage, advanced search, GPS-enabled observations, and scalable architecture supporting future AI-based species identification.

URRJA – Decentralized Peer-to-Peer Energy Trading Prototype

Created a prototype platform enabling decentralized energy trading between users.

Key Feature:

- Enables peer-to-peer buying and selling of surplus solar energy.

Position of Responsibility

AI/ML And Data Analytics Team Co-Lead, Google Developers Group, VIT AP

Jan 2025 – Jun 2025

Research Team Lead, Entrepreneurship Club VIT-AP

Jul 2024 - Oct 2024

Documentation & Content Team Lead, Anchoring Club VIT-AP

Sept 2024 - April 2025
