Summary

Aspiring Full Stack Developer with strong foundations in AI/ML and hands-on experience building end-to-end web applications using Python, React, and Spring Boot. Skilled in integrating machine learning models into scalable backend systems and developing real-time, data-driven applications. Passionate about solving real-world problems through full-stack and intelligent systems.

Skills

Languages: Python, Java, JavaScript, TypeScript, SQL

Frontend: React.JS, Angular, HTML, CSS

Backend: Flask, Node.js, Spring Boot

AI/ML: PyTorch, Scikit-learn, CNNs, NLP

Databases : MySQL, MongoDB, Redis

Tools: GitHub, Git, Postman, EXPO CLI

Projects

Ocean Intelligence: Centralized Platform For Ocean-Based Research

Developed a full-stack platform to manage and analyze ocean biodiversity data with real-time processing.

Key Feature:

- Automated data ingestion pipeline integrating marine data into PostgreSQL.

Early Detection of Mental Illness Using CNN and Chat Bot

Built an AI-powered application for detecting Alzheimer's stages from MRI scans using deep learning.

Key Feature:

- CNN model with 90%+ accuracy integrated into a web-based prediction system.

EnvDex – Premium Biodiversity Journal & Species Archive

Developed a full-stack, offline-first mobile application for recording, organizing, and tracking flora and fauna observations through a Pokedex-style biodiversity archive.

Key Feature:

- Built a complete React Native + Expo + Realm ecosystem with local authentication, media management, species grouping, GPS-based observations, advanced search, and future AI/cloud integration support. .

URRJA – Decentralized Peer-to-Peer Energy Trading Prototype

Created a prototype platform enabling decentralized energy trading between users.

Key Feature:

- Enables peer-to-peer buying and selling of surplus solar energy.

Position of Responsibility

AI/ML And Data Analytics Team Co-Lead , Google Developers Group, VIT AP	Jan 2025 – Jun 2025
Research Team Lead , Entrepreneurship Club VIT-AP	Jul 2024 - Oct 2024
Documentation & Content Team Lead , Anchoring Club VIT-AP	Sept 2024 - April 2025
